Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 3/31/2003 fails to comply with 37 CFR 1.98(a)(1), which requires a list of all patents, publications, or other information submitted for consideration by the Office. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Objections

2. Claims 16 and 21 are objected to because of the following informalities: In claims 16 and 21, "connoting" should be --connecting--. In claim 16, "connectin" should be --connection--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 16 is rejected under 35 U.S.C. 102(e) as being anticipated by Wright et al. '540.

5. The patent to Wright et al. discloses all of the subject matter of a vacuum cleaner including a suction port body 26, an electric blower "E", a connection pipe 34,82-86, a cyclone-type dust collection part "G" disposed between the suction port body and the electric blower, wherein a suction air guide 50b is provided that comprises a cylindrical portion which is fitted on top of the

Art Unit: 1744

dust collecting chamber 50 and which also has an exhaust portion formed so as to protrude from a center of a ceiling surface into the dust collecting chamber. Wright et al. also discloses an airstream inlet 80 which includes a connecting portion connected to the connection pipe and a flow in portion.

Allowable Subject Matter

6. Claims 17-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 20-31 are allowed.

8. The following is an examiner's statement of reasons for allowance: The prior art does not disclose nor render obvious the claimed combination of a vacuum cleaner having a suction port body, an electric blower, a connection pipe, a flow-in port and a cyclone dust collecting part. The cyclone dust collecting part has a first dust-collecting chamber 2 and a second dust-collecting chamber 3, both considered to be cylindrical in shape. The first and second dust collecting chambers are arranged side by side along an axis thereof and separated from each other by a partition wall

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Scalfani et al., Davis et al., Sepke et al. and Stephens et al. show the current state of the art in cyclonic vacuums.
